UNDERWATER PAINTING – What is it?

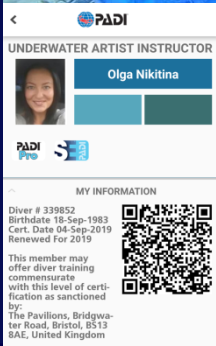

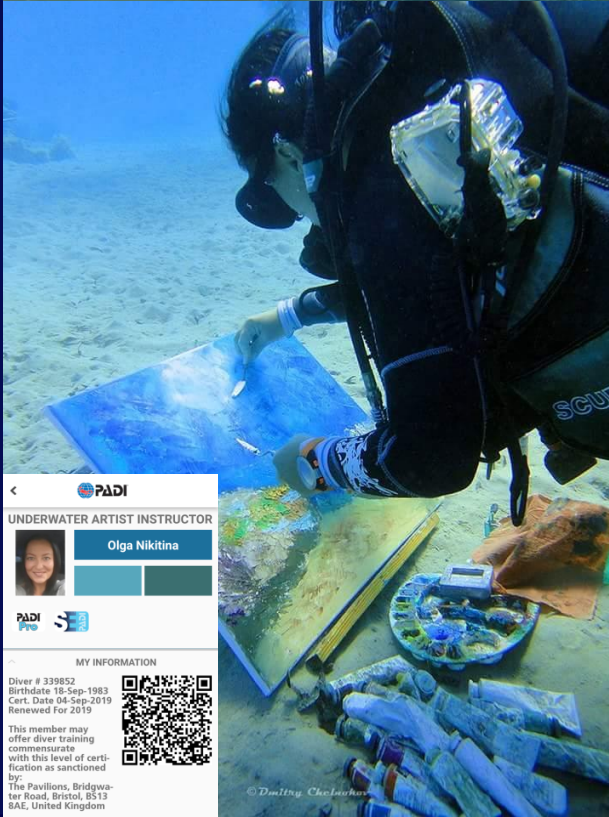

The original pioneer of underwater painting was Andre Laban, the engineer of Cousteau's team.

The first underwater boxes for cameras are his invention as well. He was a chemist, so he created a special cover for canvas and he found out what colors are possible to use underwater for painting, and that it is not toxic for the environment. He has been painting underwater for 20 years and his works are now all over the world.
